Job offer

**Web Developer senior**

Tree-Nation

Tree-nation.com is an innovative social network run by an international team, based in Barcelona, Spain.

Using the latest in mapping technology and Web 2.0 user interface, Tree-Nation is creating tree planting projects all over the world. Through its website, it offers a unique way to participate to a wider public and also to corporate clients.

Please visit our website for more info. <http://tree-nation.com>

Job offer

We are looking for a web developer senior, to pursue and improve the development of the social network tree-nation.com. You will join a team of skilled programmer and contribute to the creation of new functionalities as well as the maintenance of the infrastructure.

Requirements

- Perfect knowledge and experience with PHP5 / AJAX / CSS / JQuery / MySQL
- Perfect knowledge and experience in system administration
- Minimum 5 years of experience architecting highly scalable systems
- Able to show us many sites you developed.
- Fully passionate for your work and IT environment.
- You will need to be very rigorous and structured in your work, be aware of latest trends in your field, and program in an efficient way.
- Excellent communication and collaboration skills.

Also, personal values and environmental values are important to us.

Salary

Salary + Bonus upon achievements. Conditions to be discussed.

Position type: Permanent.

Work Location: Barcelona
